### Sept 11 Notes:

Homework (complete both A. and B. – suggest you do A before B)

A. Get an AOPA free account: signup here:

[https://www.aopa.org/asf/osc/loginform.cfm?course=kbyg&project\\_code=&](https://www.aopa.org/asf/osc/loginform.cfm?course=kbyg&project_code=&)

Then signup and complete the below free interactive course:

B. Read chapter 4 and finish all questions in the Exam booklet pertaining to chapter 4

Remember 11 Sep will be a stage check so also go back and review any weak areas in Chapters 1-3.

There is a method to this – first, airspace is an integral concept to much of the flight environment, the way to really learn the flight environment chapter is to focus on airspace first. Second, airspace is a big portion of regulations (coming up soon). Finally, having a good knowledge of airspace will help you in weather and flight planning. Get the idea – you need to know airspace...

***Once you know airspace, what might seem like a mission impossible will become a mission possible...***
